

# ORANGE COUNTY CONVENTION CENTER'S ONSITE SERVICE PARTNERS

Meeting planners have always been attracted to Orlando's beautiful year-round weather and unbeatable attractions. However, the reason they come back year after year is because the **Orange County Convention Center (OCCC)** is more than just a pretty place—it's a dynamic professional facility that offers flexible space, reliable services, state-of-the-art technology and superior hospitality for show management, exhibitors and attendees.

## Electric, Plumbing, Rigging and Technical

**Services** are provided exclusively by the Orange County Convention Center. Utility services cover all your electrical and plumbing requirements from floor to ceiling. Rigging from the steel in the exhibit halls virtually eliminates the need for lifts, keeping your show floor clear for efficient move in and out. Technical Services include architectural lighting control, audio, video and signage infrastructure.

**Centerplate** crafts and delivers extraordinary entertainment experiences at more than 30 of North America's premier convention and entertainment venues. Centerplate's experienced team of professionals offers corporate, convention and local guests a level of food and service rich in detail and comprehensive in approach.

**Cosby's Corporate Massage Services** is ready to work with Show Management, Event Planners, Exhibitors, and Corporate Clients to help make every event a more stress-free, relaxed, and refreshing experience for attendees, exhibitors, VIP clients, and staff.

**FedEx Office Business Center** is the exclusive business center for all convention participants, offering full-service printing of conference materials, production of vinyl banners/signs, Internet access and faxing. Complete packing, shipping and receiving services are also available.

Whether traveling for business or pleasure, as the preferred mobility service partner of the Orange County Convention Center, **Scootaround** provides a simple, convenient electric scooter, wheelchair and oxygen rental service on-site.

**Smart City**, the Center's exclusive provider of Internet and telecommunications services, offers

facility-wide shared Ethernet access, the country's largest WiFi convention network, turnkey data networking, and support for LANs, WANs and VPNs.

**iStreamPlanet** has partnered with Smart City to offer streaming media services—managed webcasting—to the Orange County Convention Center. Using this technology, show managers are able to broadcast live keynote addresses, product launches, training sessions and sales presentations to thousands of attendees.

**LMG, Inc.**, the on-site, preferred audiovisual contractor, has a reputation for providing expert technical support and a range of services that includes video projection, LED walls, plasma rentals, teleprompting, audio packages and lighting systems.

**Bags** offers premium "front door services" designed to raise the bar on quality and convenience. Bags combines a full-service, multi-airline, remote Skycap operation and baggage and coat-check services, with a first-class valet service, to give attendees the freedom to focus on their event.
